# Xprtly! Portfolio

- Xprtly! XaaS™ - Xprt as a Service
- Xprtly! Enterprise™ - Architecture behind Xprtly!
- Xprtly! Analytics™ - Reporting and Analysis

# Xprtly! XaaS™ - Xprt as a Service

With Xprtly! XaaS™ you can:

- ✓ be connected to an expert instantly
- ✓ access **qualified assistance** anytime
- ✓ **reduce** your consulting and IT **costs**
- ✓ achieve **faster** issue **resolution**
- ✓ **mitigate risk** and reduce over-runs

Now you will be able to:

- ✓ be billed for time you **actually use**
- ✓ access the **right person** at the **right time**
- ✓ use internal and external experts equally
- ✓ **proactively report** on all interactions

Xprtly! XaaS™

Experts by the Minute™

# Xprtly! Platform™ - Architecture

## Xprtly! Platform™ - different user types:

- 👉 *end user* – submit requests for expert assistance
- 👉 *xprt user* – receive and respond to requests
- 👉 *admin user* – maintain system attributes and run reports

End User

The End User interface is shown on a mobile device. It features a login form with fields for 'username' and 'password', a 'Remember me' checkbox, and an 'Enter' button. Below the login form is a 'Next' button. To the right, a 'Welcome Andy' message indicates '0 hours remaining'. Below this, there are two dropdown menus: 'Select Expertise' and 'Select Request Type'. At the bottom, there are radio buttons for 'Express Assistance' (selected) and 'Research', followed by another 'Next' button.

Xprt User

The Xprt User interface is shown on a mobile device. It displays a list of requests with columns for 'v', 'i', 'o', 'c', 'e', 'r', 't', and 'a'. The 'Notifications' panel on the right shows a list of requests with columns for 'Priority', 'Open', 'Tasklist', and 'v'. Each request entry includes a 'Request REF254' and a 'Requested by' field.

Admin User

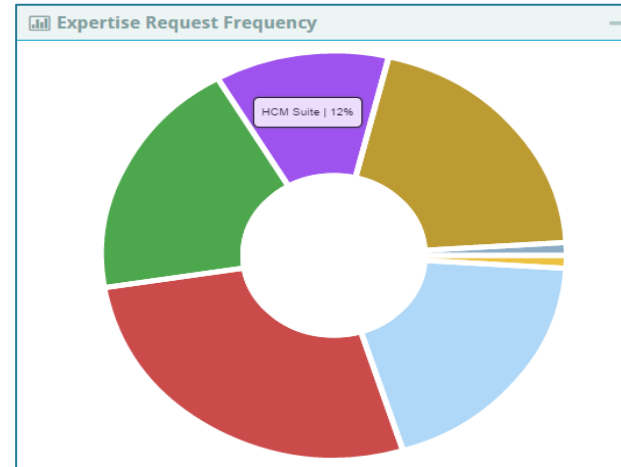

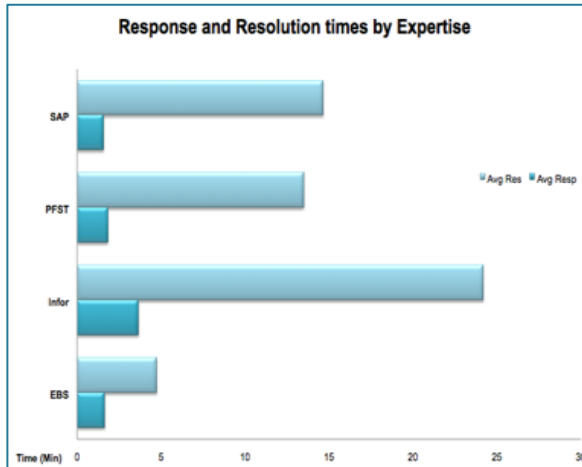

The Admin User interface is shown on a mobile device. It features a 'Dashboard' header and a list of menu items: 'Requests', 'Organization', 'Expertise', 'Request Types', 'Users', 'Projects', 'Activity', 'Event Category', 'Event', 'Appointments', 'Resources', 'Contact Us', 'Reports', 'Blog', 'Subscriptions', and 'Settings'. Each item has a dropdown arrow.

# Xprtly! Analytics™ - Intelligence

Xprtly! Analytics™ - reporting and analytics to:

- ✓ enable dashboarding for exception analysis
- ✓ provide analysis on any dimension or measure
- ✓ allow detailed reporting by request, expert or user
